THE REDCLIFF REVIEW, THURSDAY, JUNE 5th, 1930

Number 13

Large Attendance At Court of Revision

The Assessor's Figures Upheld In Most Cases.

It is some time, of ever before, since there was such a large attendance at a court of revision as was the case last Thursday evening when the Town Council met to consider complaints against the recent town assessment.

A number of complaints were registered. These were considered in order but in most cases the valuations placed by the assessor were upheld by the council.

The exceptions were the Premier Brick, the Brick & Coal and the Dominion Glass Co. for their house on Fifth St. In these cases the complainants convinced the council that there was a possibility of a mistake having been made and instructed the assessor to investigate the complaints made and report at the next regular meeting of Council.

H. G. Sheasby, as executor of the estate of which the Howard block is a part, complained again at the increased assessment on that block and pointing out that it was in a bad state of repair and that the assessor in arriving at valuations could not be applied to this building on that account. After considering the complaint Council decided to reduce the assessment on that block.

Mr. Osborne, who had an option on the old Shes factory, complained on being assessed for this year's taxes and claimed it was understood when he got the option from the town that he would not be expected to pay taxes until after the expiration of his option. As five of the councillors were of the opinion that this was the understanding the taxes were waived for this year. Councillor Brydie objected and voted nay on the motion.

The sitting of the Court of Revision was adjourned till next regular meeting of council which takes place on Monday, June 9th.

July 28th Date For Dominion Election

Election Officers Appointed and Work Under Way.

The Dominion parliament prorogued last Friday evening and immediately after prorogation, was dissolved, writs were immediately issued for a general election to be held on July 28th and nomination day set for July 21st.

As dissolution was anticipated election machinery had already been set in motion and most of the election officials have been appointed and are already at work.

John King, of Medicine Hat is the returning officer and W. Campbell has been appointed as Enumerator for Redcliff, to compile the voters list. All British subjects who have been in Canada a year and in the constituency for two months is eligible to be on the list.

According to the report of the stationing committee Rev. R. E. Pow, of Edson has been appointed to the pastorate of Gordon Memorial Church here to succeed Rev. W. B. Smith. Mr. Smith will go to Radway in the North country. The change will be made the 1st of July.

The Liberal Leader Paid Redcliff a Visit

Owing to the several other attractions that evening, the public meeting addressed by Mr. McDonald, Liberal Leader, and Mr. Lang, Liberal candidate, last Thursday evening was very poorly attended.

As both gentlemen were billed to speak in Medicine Hat the same evening the meeting here was very short.

Mr. Lang had time only to introduce Mr. McDonald to the audience and then left for Medicine Hat meeting. However he assured those present that he would return to Redcliff before the election and address the electors here.

Real Thrills In "Craig's Wife" Film

They are Provided by Murder Mystery in Story.

A mysterious double murder affords some thrilling moments in "Craig's Wife," a new Pathe picture which will be shown at the Casino Theatre on Monday next. This is particularly true when the plot of circumstantial evidence tightens around an innocent man through his wife's persistent attempts to manage his affairs.

Irene Rich plays the title roll in "Craig's Wife" with Warner Baxter as her husband. This film won the Pulitzer prize as the finest dramatic production of a New York Season. Don't miss this show.

It will be backed by a good comedy and a Pathe Review.

Redcliff Stampeded July 1st.

ABOUT YOUR TAXES

In view of the increasing revenue the provincial government now has, because of additional sources of revenue, the Conservative leader and the Conservative candidate for this constituency are advocating the abolition of the Supplementary Revenue tax.

When the motion to abolish this tax came up at the last session of the legislature every Conservative member in the house voted for it. Mr. Lang, Liberal member for this constituency, voted against it.

The motion was defeated and as a result Mr. Lang, our member, was a party to compelling all property owners in the province to continue paying this supplementary tax, which, according to Redcliff's last tax notices, was 2 mills for this town.

When the present government came into power in 1921 there were 99 sources of revenue for the province. Today there are 174 sources of revenue and on top of that there is a big increase today in the revenue of several of the old sources, such as auto licences, gas tax and amusement tax. This being the case the Conservative party and the conservative candidate in this constituency are of the opinion that the time is now opportune for ratepayers in both Urban and rural districts to be relieved of some of the taxes they have been forced to pay for several years, and that the supplementary revenue tax is one of the first that should be abolished.

Voters should remember this when casting their ballot on the 19th of this month.

Much damage has been done by forest fires in Northern Ontario.

Redcliff Town Wins First League Game

Defeat Callies 3 to 1 and Have Much Best of Play.

Despite the high wind blowing last Thursday evening the football game between the Redcliff Town and the Callies was much better than weather conditions warranted. By close passing and hard work Redcliff showed up to the best advantage all through the game and won out by 3 goals to 1.

With the wind in their favor in the first half Redcliff started off with a brilliant attack but it was not till after thirty minutes play that Ernie Podesta succeeded in getting well in and scoring the first and only goal in this period. During the whole period the ball was in the visitors half of the field only once or twice.

With the change in position for the second period, fans looked for the Callies to change the tune. But in this they were disappointed for Redcliff appeared to play better against the wind. After 18 minutes play Wainwright scored. Their attack was continued but a foul throw-in gave the Callies a free kick which landed nicely in front of Redcliff goal and in a scrimmage the ball rolled into the net through the goalies hands and fast as a thought and easily as a tramp passing a policeman.

Just here we might suggest that both Redcliff teams take ten minutes off at their next practice game and practice throwing-in. There have been far too many foul throws lately and they usually prove costly errors. In another ten minutes after the face off Wainwright scored

Former Redcliff Girl Wedded Here Sunday

Miss Thora Zeigler and Mr. Alex Close Married.

A quiet wedding was solemnized at the home of Rev. I. M. Zeigler on Sunday June 1st when Thora Nellie, fourth daughter of the Rev. Zeigler became the bride of Alex Close of Vidara Sask.

The bride appeared in a mauve crepe-de-chine dress, on the arm of her eldest brother, Henry Melvin. Her brother Ira, and sister Elvora, acting as witnesses. After showers of rice and confetti, all were seated to the wedding supper. The four tier wedding cake was brought from Sask. being made by her sister-in-law there, Mrs. H. M. Zeigler. The young bride and groom left on Monday for their farm at Vidara Sask, where they will reside.

Mr. Bullivant, the independent candidate in this constituency claims he has the ear and support of Premier Brownlee in the provincial contest. Speaking before a large audience at Magrath last Monday Premier Brownlee said he objected to independent candidates as it would be difficult to place them in the house and no one knew where they stand or what they stand for.

As there was no more scoring the game stood 3-1 for Redcliff when the whistle blew. This was a league game.

Churches

ST. MARY'S CHURCH
Celebration of Mass second and fourth Sunday of each month at 8:30 a.m.

GORDON MEMORIAL UNITED CHURCH
Rev. W. B. Smith, Pastor
Sunday June 8th, 1930.
10 a.m. Church School.
11:15 Morning worship.
Subject: "The 1900th anniversary of Pentecost."

7:30 Evening worship
Subject: "Greater things than this ye do."
Dr. Gunn, moderator of the United Church of Canada writes this in a pastoral letter, "Outward fashions and circumstances may change but the laws of the soul are the same for us as for our fathers. For steady progress in the Christian life a continual feeding upon God's word and Communion with him in prayer are necessary."

U. F. A. Sunday service will be held in Bowell School house on Sunday, June 16th at 3 P. M.

ST. AMBROSE CHURCH
Rev. Malcolm Stewart, Vicar.
June 8th, 1930

CHURCH OF BRETHREN
Rev. Ira M. Zeigler, Pastor
Services every Sunday.
Sunday School 10:30 a.m.
Morning services 11:30
Evening Services at 8:00.
Church practice every Thursday evening at 7:30.
Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

Conservatives of Town Organize for Election

Elect, Officers and Make Plans for Meeting.

Conservatives of the town met last Monday evening for the purpose of organizing for the approaching Provincial and Dominion elections which are billed to take place on June 19 and July 28 respectively.

There was a very representative gathering and the following officers for the association were elected:

President—P. Lavelle.
Vice-Pres.—A. J. Learmonth.
Sec.—E. L. Stone.
Ex. Com.—G. H. Worts, F. E. Broughton, W. Keats, A. E. Sanderson, Jas. McKenzie, J. Soukup, Thos. Balmer, Bert Allison, Bert Shaw, Jules Lavigne, Donald McLachlan, Alex Patterson, J. Devitt, W. Evans and J. Stratton.

Plans were also made for meeting to be held here for the provincial campaign when C. S. Blanchard, Conservative Candidate, will be present to address the electors.

Best Game of Season Here Last Evening

Brick & Coal and Legion Play a Scoreless Game.

As the weather last evening was ideal for football and as both teams were in the pink of condition the game between the Brick & Coal and the Legion was one of the very best seen here for many a long day.

It is seldom one witnesses a more evenly matched game as the result—a scoreless draw—will indicate. Both teams lost two or three good opportunities to score but so close was the checking and so exciting the climax that the forwards appeared to share in the excitement at the crucial moment. If anything the Bricks had the edge on the play, especially in the last fifteen minutes of the game.

During the game there was some splendid exhibitions of team work on both sides as the ball travelled up and down the field from toe to toe and from end to end with most dazzling regularity.

Jack Potter was an impartial referee but he spoiled it considerably by talking too much to both fans and players. In a close and exciting game such as the one last evening the best way to avoid trouble is to keep the play going and the best way to start trouble is to start an argument with the crowd.

The game was the first game in the Five R. Open Cup. The game called for Tuesday evening between the Town and Callies was postponed on account of rain.

BRETHREN TO HOLD REVIVAL MEETINGS

Rev. Ralph Harkick, of North Manchester, Indiana, will be in Redcliff for two weeks conducting revival meetings in the Brethren Church here. He will conduct both services next Sunday and every evening during his stay in Redcliff. Mr. Harkick is making a tour of Canada. An invitation is extended to all to attend their meetings.

Advertise in the Review.

French River, Home of Wiley "Muskie," Will Soon Echo Cries of Elated Anglers as They Battle Fresh Water Tiger

Now is the time for all good fishermen to prepare for month long bass and other finny prizes to be won by the prize anglers for disciples of Isaac Walton these balmy spring days. A wonderful fishing season is being opened up by the careful selection of location, tackle and even associates. For many a party has been ruined by the last-minute introduction of a "wet blanket" to an otherwise congenial collection of fishermen.

One of the most interesting fishing streams in North America is French River, Ontario, 215 miles north of Toronto on the Canadian Pacific Railway. This lovely river is celebrated as the habitat of the fishing population, one of the greatest fish known: huge Great Northern pike, pickerel, an abundance of small-mouth and large-mouth black bass and other finny prizes. To accommodate sportsmen and their families, a few bungalow camps—a collection of individual cabins, centering around a main clubhouse—has been erected on a cliff overlooking the river. Here the fisherman and his family can "rough it in comfort," far from the cares and anxieties of a city-day world.

That big "muskies" are plentiful at French River is proven by the fact that in recent months a monster muskie weighing 85 pounds was taken in the North Channel at the mouth of the Wabigoon River. Also, not long ago a pair of 100 lb. muskies were caught, besides their daily limit of bass, pike and pickerel, on last

than seventeen "muskie" ranging from 10 to 25 lbs. In 1925 a "muskie" of 35 pounds weight, 50 inches long and 21 inches in girth was taken in the French River. The French River Bungalow Camp will open June 15 and remain open until Sept. 15. Jack Stoddard, its general manager, is an experienced sportsman whose chief delight is coaching the uninitiated in the art of luring the fish. French River also has a fine 9-hole golf course and that devotees of the royal and ancient game who are also fond of fishing need not entirely forego the former sport in favor of the latter.

The Red Rose Tea guarantee means what it says. If not satisfied return the unused part in the package and the grocer will refund your money.

Average Lifetime In India Very Short
Record For New Zealand Is Highest In World

The country which leads the world in the average lifetime of its people is not to either Europe or America, but in New Zealand, where at the beginning of the decade, a male child at birth could look forward to 68 years of life and a female to over 65 years. According to the statistics offered by Louis T. Dublin, in his article "We Exit the Life Span" in the May number of Harper's Magazine. In Australia the expectation of life in two three years ago, but is nevertheless, higher than that of any country in either America or Europe. At the other end of the scale stands India, where the expectation of life reaches the amazingly low figure of 23 years for males and 25 years for females, a figure about equal to that of the people of Rome under the Empire.

In the United States the expectation of life is about 50 years, being a little less than that figure for males and a little more for females. There has been an extension of 9 years between the years 1900 and 1927. In Europe Denmark has the best standing, a figure about equal to that of the men may expect to live a little over 60 years and its women about 62 years.

RHEUMATIC VICTIM FOR SIXTEEN YEARS

Dr. Williams' Pink Pills Restored Her Health

Rheumatism is a disorder of the blood. Wet, cold weather may aggravate it, but that is not the cause. Bad blood charged with uric acid is the reason. It builds the blood and rheumatism will disappear. Dr. Williams' Pink Pills enrich and purify the blood. I was made good again. I had been a victim of rheumatism for sixteen years. I was unable to walk and in a few days my condition failed. I was utterly discouraged. I had heard of Dr. Williams' Pink Pills and was recommended for cases like mine. I began them and in a few days I felt better. My appetite and color improved. And now I am able to do my household work. It is wonderful what Dr. Williams' Pink Pills do. One thing but it does it well—they enrich and purify the blood. This rich blood banishes rheumatism, restores the strength and promotes health and strength. The pills are sold by medicine dealers or by mail at 50 cents a bottle. Dr. Williams' Medicine Co., Brockville, Ont.

Fingerprints Are Radioed

Photographs, Also, Exchanged, Between Berlin and Buenos Aires

The police of Berlin and Buenos Aires are exchanging photographs and fingerprints by radio. The prints of a criminal ten fingerprints are sent in eight minutes and were received with clearness which readily permits indexing and identification.

The radio transmission of photographs however, has not yet been so successful, but pen and ink drawings from photographs can be transmitted perfectly. Berlin radioed to Buenos Aires a sketch of its chief of police to Berlin. Both were reproduced exactly.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite charm. Adds a subtle finish to the fairest white. Cannot be overpraised for softening the hands and making them gleefully white. Cool and refreshing. Daily fragrant. Delightful to use. Shows immediately to all women who care for feminine distinction.

Fair Booklet Issued

Under the title "Hints for Exhibitors," the provincial department of agriculture has issued a booklet that deals with exhibits and the preparation of exhibits for the World's Grain Exhibition and Conference that will be held in Regina July 25 to August 6, 1933. Copies may be secured by applying to the department. Hon. W. C. Buddie, Minister of Agriculture, is chairman of the executive Saskatchewan committee.

Head the Spaul with Minors.

Law With Teeth

Two thousand Austrians through several thousand miles removed from America are kept by a prohibition law with teeth in it. They are persons who have constituted many prizes while under the influence of alcohol and who have received sentences which become effective when they take another drink.

W. N. A. 1836

Children's Croupy Colds Quickly Relieved

Take a saucer or pitcher of water; place it on a spirit stove or lamp and heat half a teaspoonful of Castorosem to a pint of water. The steam from the kettle all the room so that medicated air is breathed in by the child. The distressing cough is relieved. The inflammation is reduced. Good results are quickly noticeable from using Castorosem in this manner. Even small infants like this treatment is ideal. Every good druggist sells Castorosem. In 50c bottles.

Production and the Market

Dairy Products and Livestock Could Be Increased To Canada's Advantage

While Canada has been increasing her wheat acreage at the rate of a million acres a year every other aspect of agricultural production has been standing still or sliding down hill. While the wheat crop goes begging the British market is falling for Canadian wheat. Canadian dairies, more Canadian condensed milk, more Canadian butter, more Canadian cheese, more Canadian poultry products. The simple fact is that agriculture in this country has gone far out of balance.

This is the argument of R. D. Colquhoun, in an article in The Country Guide, Winnipeg, and there is little doubt evidence to support his contention.

What has happened is that Canada's agricultural production has gotten completely out of balance. We have a national deficit of two such important products as butter and milk. Our livestock exports are at the vanishing point. It would be no surprise to some who see this situation. It is not that the Dominion has a New Zealand lamb on the meat counter of our cities if a change is not made. Of course, condensed milk and other products we are selling less abroad every year. This kind of thing can not go on forever, says the author. Production must be reshaped to fit the market. We have got to balance up. Otherwise the figures at the bottom of the column will be written in red ink.

These considerations, however, must not blind the observer to the fact that wheat growing is the chief business of large areas in the West because these areas are adapted to production and would fall as unimpaired farming areas.

Plan During Venture

Group of Japanese Business Men Sponsoring Air Line Across Pacific

A project of inaugurating a regular passenger and air line between Japan and the United States and Canada to shorten the distance between the continents for three days is reported to have been organized by a group of Japanese business men and financed at a capitalization of \$75,000,000. Four huge ships, resembling the Graf Zeppelin, which entered the globe last year, are expected to be employed for the regular air trips.

The Japanese government has been officially asked for the necessary permits and those behind the enterprise say they propose to go right ahead with their preparations.

Sold Hoshino, noted Tokyo business man and one of the promoters, says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger, he said, would be \$1,200. "It may take us a year or two to complete organization," said Mr. Hoshino. "International agreements will have to be negotiated. But we are absolutely serious in this undertaking. It is a daring venture, but we believe that it is feasible and we are prepared to go right ahead with it."

Miller's Worm Powders can do no injury to the most delicate child. Any child or infant in the state of infestation, who is infested with worms can take this preparation without harm to the stomach, and will find in it a full and complete cure. It is free from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

An Odd Ornament

A human jaw bone carved with hieroglyphs and made into a pendant is an odd piece of jewelry worn by one of the prehistoric Mayas and found recently by a British archaeological expedition in British Honduras.

One advantage the Senators will enjoy now is that for whatever happens they still have a woman to blame it on.

Used-pair auction sales are being held in Africa.

Lives Have Been Shortened

Men Who Saw Actual War Service Are Dying Comparsitively Young

Hon. Dr. Manion, speaking before the parliamentary committee on pensions, and returned soldiers problems the other day, made a statement which is highly significant. He said that of those men who served in an actual theatre of war between 1914 and 1918, very few will be able to reach the age of sixty-five. Being both a physician and a war veteran, Dr. Manion has some intimate knowledge of the conditions under which men lived during these war years, and of the effect which these conditions had on mind and body. And his considered opinion is that few of them will come within five years of reaching the allotted span of three score and ten years of life.

This statement is further amplified by the figures quoted by Major Wright of the pensions department. His figures showed that \$48,804 Canadians received an actual theatre of war. Of these, some 60,000 were killed in active service. Of those who did return to Canada, however, 33,378 are known to have died in the war. There may be many more who have died and of whose deaths there has been no record, but the records available show almost 30,000 deaths in the first ten years after the close of hostilities.

This is a condition worth pondering over. The war veterans of Canada are dying off at a great rate and it is only logical to expect that the rate of mortality will increase rather than decrease during the next decade and the one to follow. Indeed, Major Wright's figures rather support the assertion of Dr. Manion that few of the veterans who served in an actual theatre of war will reach the age of sixty-five.

This is not a very cheerful outlook—for the veterans. Yet it is recognized that war conditions were such as to prematurely age many men, and to rob them of the strength and vitality that would carry them on to the natural span of their lives. Their lives have been shortened by their service to their country. Their earning powers have been curtailed because they are growing old in body and mind although not in years. There is a difficult situation, and one in which they merit all the sympathetic consideration that can be given them by a grateful people.—Oshawa Times.

Douglas' Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lumbago, inflammation, burns and feline.

Prizes For Registered Grain

To encourage the growing of registered grain, the Melford, Sask., Wheat Club is to supply 25 teen age boys with two bushels of registered seed corn or enough to sow an acre of land. A cup and other prizes will be presented in the fall for the best grain.

The United States will show the best features of its "billion dollar poultry industry" in an exhibit to be sent to the World Poultry Congress in London this summer.

No Moths In Arctic

Woolens Mitten Seventy-Eight Years Old Are Like New

Clothes moths are unknown in the Arctic. A pair of woolen mittens, hanging in the office of O. S. Finlay, at Ottawa, testify, Mr. Finlay is director of the North West Territories and Yukon Department of the Interior.

They were knitted—these mittens—in England 80 or 90 years ago. A bundle of them was purchased by the outfitters of Captain Sir Leopold McClintock, commander of one of the ships that went north, in search of Sir John Franklin.

They were fastened up in a cask and cached on Dealy Island, in 1852, exactly 78 years ago. Last spring, Inspector Joy came upon the mittens, and he used them. They are back in civilization, and look like new.

Please This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy says it is the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

A Giant Tree

A giant spruce, more than 275 years old and measuring 128 feet in height, has just been cut down in Gaspara park in Vermont. At the root the ancient tree had a diameter of 44 inches. It was sawed into five sections, containing in all more than 115,438 cubic feet of solid wood and plenty of supplies for making pulp.

The West Helps the East

The reduced volume of wheat production in Western Canada last year, coupled with the serious tie-up in grain shipments owing to the absence of a profitable export market, has at least had the effect of opening the eyes of Eastern Canada to certain facts which formerly they did not realize, or at all events were loath to admit did exist.

For a long period of years, even in fairly recent years, the opinion was voiced throughout the eastern portion of the Dominion that the West imported quite a drain on the East, that the East was taxed to provide immigration, transportation, and other services for the West, and for which the East received no adequate return.

Now, apparently, this view is no longer held, for we find such an outstanding Ontario paper as "Toronto Saturday Night," which more or less reflects the financial viewpoint of the city in which it is published, featuring an article which opens with the following paragraph:

"Behind the dark curtain of wheat—the emphasis which has been placed on failure of the last crop to move—the controversy over marketing methods with the resultant propaganda—is to be found the rapid development of the status of the Canadian west. A clear and unbiased examination of the facts—the facts alone dissociated from the passions aroused by factional contention—is vital to east and west alike. Upon such knowledge only can the confidence of the manufacturer in his commitments for the summer and full months of the year be founded. There is no disputing the fact that the balance between property and a curtailed volume of trade runs up the West's purchasing power."

"The admission, or recognition, contained in that last sentence is certainly refreshing and welcome to the people of Western Canada. Its recognition by the East must undoubtedly mean the rapid development of a better understanding between the vast sections of the Dominion which lie to the east and west respectively of the Great Lakes. And such better understanding is vital to the welfare of Canada."

The second fact which is pointed out in the past twelve months have brought forcibly to the attention of the whole country is that the volume of freight traffic provided for our two great transportation systems by the grain shipments of the prairie provinces is so important, yet, a vital factor in maintaining their net profits at a satisfactorily high figure. Not so long ago, the railway managements contended that rates for western grain carriage paid by the Railway Commission were so low that there was no margin of profit for them in this class of business; that, in fact, there was a loss taken in the movement of western grain, which loss had to be made up out of other earnings. This, therefore, also constituted something of a grievance in the eyes of eastern shippers.

Now, however, both railways have frankly attributed the drop in their profits, in not merely the gross but the net profits, to the heavy decline in grain shipments. The heavy losses, they have admitted the probable nature of the western grain business, from a railway transportation standpoint.

These things are greatly significant. It is well known that freight rates on grain in Western Canada are much lower than they are on railways in western grain areas of the United States, and to that extent the Western Canadian farmer has an advantage over his United States competitor in world markets. It is, however, gratifying to know that such advantage is not gained by imposing actual loss upon the transportation companies of this Dominion.

To the West, too, it is gratifying to know that it is a vital factor in promoting the prosperity of the manufacturing industries of the East. That is as it should be. The West desires to help Canada forward. It is anxious that the settlement of its broad areas and the fertility of its soil should result in big and profitable business for the East. The West prefers Canadian-made goods above all others, and it is a source of gratification to our people to realize that we have it in our power to confer the benefits of increased business and prosperity upon our fellow Canadian citizens east of the Great Lakes.

Out of the troublous times and somewhat bitter experiences of the last season there has come the heavy realization, both east and west, of our dependence on each other; of our common interest in the welfare of each other; in our joint pride and concern in the progress and prosperity of our common country.

Establish Reference Monuments

During the summer of 1929, the Geodetic Survey of Canada, Department of the Interior, established fundamental reference monuments in fourteen towns and cities of Saskatchewan and Manitoba. The sites, usually in improved city parks, were granted by the municipalities. Each site bears a bronze plate on which is inscribed the elevation, latitude, and longitude of the monument as established by the Geodetic Survey.

The Average Life of a Dredger Ship

Reduce the Acid

PHILLIPS'
Milk of Magnesia
For Troubles
Due to Acid
Indigestion
Constipation
Headache
Nervousness
Stomach
Disorders

Sick stomachs, sour stomachs and indigestion usually result from excess acid. The stomach harvests are over-stimulated. Too much acid makes the stomach and intestines sour.
Almost kills acid indigestion. The best form is Phillips' Milk of Magnesia, because it is harmless. It soothes the stomach, neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard, with physicians everywhere.

Take a spoonful of water and your indigestion condition will probably be in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Do not take anything else. It may have a great many disagreeable results. It is the only safe Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting cases of acid. Each bottle contains full directions—any druggist.

Expect National Livestock Policy Recently Formulated Will Greatly Aid Industry

Following the appointment of a committee of three, and a federal livestock policy has been formulated by the Canadian livestock co-operative organizations, following the recent all-Canada agricultural conference in Ottawa. It was announced by W. D. Mackay, president of the Canadian Livestock Co-operative.

It is proposed that the committee of three, comprising a representative of the livestock co-operatives, a representative of the federal department of agriculture and a third to be chosen by these two, have the direction of the national policy, which will involve the construction of two demonstration abattoirs, one in eastern Canada and one in the west.

Location of the western plant has not been decided yet, but there is some possibility it may be built in Regina.

The purpose of the policy is to enable producers to secure information as to production, distribution and marketing, as well as production, so that not only will costs of processing be determined, but also grades made on a proper basis for both live animals and meat products. "It is the intention," said Mr. Mackay, "to cover all phases of the industry from producer to consumer. There are serious defects in production as well as in processing, distribution and marketing."

The policy outlined is the aftermath of the Ottawa conference in March between representatives of the federal and provincial departments of agriculture and of the livestock co-operatives, when a resolution was adopted requesting the federal department, in association with the co-operatives, "to investigate the reasons for the fluctuation in prices of livestock and meat products, and endeavor to construct a policy which will stabilize prices to profitable levels, particularly with reference to selling of such products on the export markets."

"The proposal," said Mr. Mackay, "does not contemplate any interference with the established packing industry, but the proposed two demonstration abattoirs will be in the nature of research laboratories, designed to establish the necessary parity in prices between the live animal and the finished products, to determine the possibilities of extending the range of variety of products and to ascertain the extent to which diseased animals should be a charge on livestock production."

"These demonstration abattoirs would be an invaluable aid to the industry in solving problems which will doubtless arise as the industry develops. Right or wrongly, the majority of producers today believe they are paying unnecessary charges for a huge surplus of equipment, for excessive costs on equipment and for out-of-date equipment."

"These are some of the reasons why the livestock industry is languishing and why it is impossible to persuade the producer to increase production to the point where it would be possible to meet the requirements of a continuous supply of uniform quality products. "While livestock production has made progress in the past 15 years, it has made less progress than any other industry in the Dominion. In fact, Canada's exports of livestock and livestock products are rapidly approaching the vanishing point, whereas this should be one of our big sources of national revenue."

Canadian cattle exports have dropped from 20,000 head in 1925, to 162,000 last year, and live hogs in the same period from 99,000 to 3,000 head. Exports of hog products have dropped from 136,000,000 pounds in 1925, to 59,000,000 pounds in 1929.

For the same period total slaughtering of Canadian cattle have declined 168,000 head, and hogs, 160,000.

"The seriousness of the trend cannot be grasped when the importance of the livestock industry to agriculture and the importance of agriculture to the national welfare is considered. Because of the relationship between agriculture and industry the problem is of as great interest to the city man as the farm resident, and it affects the welfare of eastern Canada just as it does that of the west."

"Money has been expended for research and laboratory work in connection with other commodities, and it is just as imperative that similar assistance be given to the livestock industry. At present a declining national asset. If steps are not taken to put it on a par with other industries, all industry will suffer."

"The present condition of the produce is afraid to increase its production. It is essential he receive some assurance that his efforts will not be met by greater losses."

CHILDREN AND COZY

All Tingey models are created and sketched in Paris and the patterns are made in New York. From long experience, mothers have learned there are few cute more suitable and becoming to the wee ones than those of the type pictured.

With today's pattern one could make numberless little dresses for little Elizabeth, Ann and Mary Jane, with variation of color and material, giving each model look interesting and different.

The original dress is a dainty flowered thin woolen of the chalice type, was of pale yellow with pink roses and bindings. Plain blue and white with white binding would be adorable, so would white dimites and spotted ones with pink and white. Other schemes are checked and spotted or flowered notions with contrasting edges, and wool or cotton voles. Van silk is also lovely for such little frocks.

This pattern may be obtained in sizes 3 to 12. It is ready for immediate delivery. It is hand cut.

Pattern No. 7079. Be sure to get it in size of pattern. Address Pattern Department.

Launches "Helene"

Miss Nesta Gillies, daughter of Captain James Gillies, C.B.E., general manager of the Canadian Pacific Steamships, Ltd., who launched the "Princess Helene" from the yards of Messrs. Wm. Denny & Brothers, Ltd., Dunbar, on April 29th.

All this talk about Wall Street having a tonnage of about 4,000 and her port of registry will be Saint John, N.B. She is intended for the Canadian Pacific Mail of Fundy service.

Who Controls Canada's Wealth

Estimates Show Largest Per Cent. Of Securities Held By Canadians

All this talk about Wall Street owing Canada does not stand up before facts. The wealth of the Dominion is between \$28,000,000,000 and \$30,000,000,000 according to the latest figures of the Dominion Bureau of Statistics. Of this sum outside capital makes up \$8,900,000,000, or not more than one-fifth of the whole. And this one-fifth is by no means all in the hands of American financiers. More than \$2,000,000,000 of the amount belongs to the British Isles. The balance share being \$3,470,000,000.

Further, the bureau estimates that from 55 to 60 per cent. of the securities of all enterprises on Canadian soil are in Canadian hands, and that, in addition, Canadians have invested around the sum of \$1,745,915,000, of which nearly \$1,000,000,000 went to the United States.

In other words, Canada's 10,000,000 people have invested outside of their own country something like 30 per cent. of the amount that represents outside investments in Canada.

Idea Might Be Useful

Ontario Town Has The For Old Motor Cars

Never again will worn-out motor cars be discarded to the scrap heap in this locality. A new use has been found for them.

More than 150 motor relics were taken to Greasy nose limit age and placed along the shore of Lake Ontario and filled with stone. The water in the lake is high at present and formerly the sea continued to sweep over the road, practically ruining it for traffic.

The automobile breakwater, however, has proved successful and the road is now in first-class condition.

FORCED DOWN BY FOG

A privately chartered aeroplane bound from Montreal to New York, with Rev. Alva Pappano, rector of St. Catherine Church, and Charles Moyn and Leonard Lehan, Montreal business men, as passengers, became lost in the fog, and had to make a forced landing on the estate of Dr. G. H. Dunn, at Kitchissippi, N.Y. It was reported that the machine lost a wheel while making the landing. George Pignon, a former war aviator, was piloting the machine. The photograph here shows the aeroplane after the landing.

Prince Will Launch Liner

Hier To Throne Is Sponsor For New C.N.R. Boat

Believed to be the first time that a great passenger liner has been sponsored by the heir to the throne, recent announcement that the Canadian Pacific new ship will be launched by H.R.H. the Prince of Wales has been greeted with great acclamation by the press in all sections of the British Isles.

The Glasgow Herald commented editorially for the effect that it is "a matter of great satisfaction to the people of Scotland that the Prince is coming to perform this important ceremony. It is peculiarly fitting that the Empress of Britain should be christened by H.R.H. for an indissoluble link between the Clyde and the Dominion has been forged to most efficient through the efforts and example of the Prince."

A tribute is paid in the same paper to the service of the Canadian Pacific ships that have recently been built on the Clyde.

In addition to the launching of a passenger vessel by H.R.H. being announced, it is remarked upon that quite a departure from precedent has been made in the fact that a lady usually performs the act of sponsorship.

The last occasion upon which royalty officiated at a passenger liner's launching was when H.R.H. the Duchess of York sponsored the 20,000-ton Canadian Pacific liner that bears her name.

Predicts Speedier Motor Cars

Will Come With Better Highways, Says Sir Henry Segrave

Automotive racing cars which will travel so fast that the human eye will be unable to record their passage are mechanical eventualities—speedsters on land which will outstrip the swiftest aircraft, that have been designed for cruising among the clouds.

That, at least, is the prediction of Sir Henry Segrave, owner and driver of the world's fastest automobile, the spectacular "Golden Arrow" which was powered to attain a maximum speed of four miles a minute and which was timed at Daytona Beach at the unparalleled velocity of 231 miles an hour.

Sir Henry Segrave maintains, says "The Scientific American," that with the eventual building of super highways in the United States and with future perfection of the ordinary motor car, American motorists will travel at speeds from 100 to 150 miles an hour during their cross country tours with as great ease as they now journey in automobiles. There are a lot of angels who might have been boasting of seventy-eight years in this earth today, were it not for the fact that they failed to see an automobile . . . a certain speeding one, at least.

May Be Lucky

Deep in the wilds of New Jersey lives a man of seventy-eight who has never seen an automobile. Will there be a lot of angels who might have been boasting of seventy-eight years in this earth today, were it not for the fact that they failed to see an automobile . . . a certain speeding one, at least.

Development Of Extensive Fish Industry In Hudson And James Bays Planned

Farming By Machinery

Mechanical Aids Have Followed Each Other In Quick Succession

Early in the day, on farms large and small, the inventor and manufacturer largely repeated their triumphs in factories and mills. Their resper had started a revolution on the land before the Civil War. But that crude device, which merely cut the grain and left it unbound in piles, was superseded by the automatic self-binder, and later, in the West, by a machine that cut, threshed and bagged wheat ready for the market all in a single operation.

In 1870 the chilled steel plow, light and durable, was available at a low cost to farmers long accustomed to the heavy, lace-breaking implement of ancient memories. Swift in succession came mechanical corn planters and wheat drills that drove from the fields the men who dropped or sowed grain by hand. Then hoes, harrows, and plows, hay rakes, potato diggers, tractors, gas engines and other prime inventions made a change in the cultivation of the soil scarcely less profound than that wrought by the spinning jenny, the loom and the last furnace in the methods of manufacture.

The man or woman with a hoe, bowed to the weight of centuries, now mounted a tractor and drove a furrow with the knock of a motor. If, unlike the hand-operated, the farmer worked alone in the open country, still the automobile, rural postal service, telephone, and radio now gave him quick communication with the market, bank and grange.

Dairying As Side Line

Good Profit Can Be Made From Butter Sale

H. R. McMillan in a speech before the Vancouver Board of Trade, tells how Canada imports 20 per cent. of the butter supply the U.S. The Ontario farmer (which, of course, includes the farmer's wife), didn't make Ontario the province it is today by buying butter. And that is one of the first lessons the Western farmer has to learn—that if he is to take care of the lean years and the poor markets—he must go into farming in all its branches—be his own keeper and make his own butter, he must raise his own poultry.

It was the most of them used to clothe the family too, in the same way. Most farmers can not afford to pay cash for "stuff" that they grow on the farm. Specialized farming communities prosper during favorable cycles, but the lean years which invariably come usually have a trail of disaster for the one-crop enthusiast—Vancouver Province.

The Great Northern Plains

Area In Dominion Furnishes Pasture For Most Of Caribou

There is an area in Northern Canada lying between the timberline and the 40-degree of the Arctic Ocean and Hudson Bay, which includes about 600,000 square miles or nearly one-seventh of the area of the whole Dominion. Although not producing furs this area is not barren but provides pasture, in places unsuitable for the migratory musk and caribou. Several exploratory expeditions have been made through portions of this area during recent years by surveys of the Topographical Survey, Department of the Interior.

Invents Airplane Trolley

Combining the features of the airplane and the overhead trolley, Joseph Archer, a French engineer, has perfected a new electric trolley capable of a speed of 150 miles an hour. The invention will be demonstrated in Paris shortly. The car is similar to that of the airplane. It travels on a monorail. Pin-like wings projecting from the sides support much of the car's weight when in motion. It can be brought to stop within 300 feet by reversing the propeller.

Source Of Cheap Leather

Seeking to turn every part of the whale into profitable use, Norwegian whalers, with the aid of a Swedish chemical engineer, have perfected a process of converting the bones, animal's intestinal membrane and other waste into leather. It is a tough, almost indestructible and cheap leather for gloves.

Prospects of developing an extensive fishing industry in Hudson Bay and James Bay are scented by the Dominion Government. Some time ago the government's fisheries plan to send an expedition northward to find out just what fish, if any, there are in the great northern inland sea.

The completion of the Hudson Bay Railway to Churchill and the opening of the great inland sea will be the tremendous area of water to the tremendous area of water for prompt delivery of fish to southern Ontario, the prairie provinces and the central states.

The expedition will be composed of practical fishermen accompanied by a scientist. They will sail northward in a regular fishing ship, possibly a trawler or perhaps a schooner. Owing to the tremendous area of water to be investigated it is felt the expedition will require at least two years to complete its work.

The fish experts, who may be called, will sail about the bay dropping anchor here and there and catching whatever fish are available. They will observe and note the varieties of fish and the quantities in which they are found. The expedition will have to be carried on and the type of boats required for successful commercial operations.

Although men have sailed over and lived around the bay for centuries there is no accurate knowledge of the fish to be found there. It is known that fish are plentiful in rivers emptying into the bay but no one knows whether they exist in the bay itself. The only fishing ever done in the area has been on the small scale demanded by immediate local consumption. Consequently the only chance for the bay to become a source of food for the people of the north is the bay about the mouths of rivers and in the neighborhood of settlements.

The department feels it is best to make its investigation early before attempts are made at commercial fishing. In this way they may be able to avoid loss to private individuals. But they will also determine in advance the regulations which should apply to any commercial fishing which might develop there and will avoid the difficulty of imposing regulations on fishermen who have already established their business.

To Take Canadian Census

Will Give Employment To 1500 Persons Next Year

Preparations are under-way for the twentieth census of Canada to be taken in 1931, giving employment to 15,000 persons. The whole country will be covered by information seekers, getting statistics as to population, births, deaths, migrations, sex, nationality, age and occupation. Production in all its forms, including mining, transportation, marketing, and finance will be looked into. Altogether there are 31 main headings in census classification and 16 sub-section headings.

Ice From Desert Sands

Terrid desert sands may furnish the ice of the future, and it will be twice as cold as ice made from water. The commercial possibilities of "dry ice" from carbon-dioxide wells lying beneath the arid stretches of western Colorado and eastern Utah are being stressed by the United States Department of the Interior.

THURSDAY, JUNE 5th, 1930

OUR POSITION

It has been the custom of the Review to endeavor to be as independent as possible in its columns so far as politics are concerned. In this provincial general election however, the constituency of which Redcliff is a party has two newspapers, the Medicine Hat News and the Redcliff Review. In season and out of season, during a political campaign and between campaigns the News has favored the Liberal party and its candidates in every possible way. As a very large percentage of the general public likes a square deal and likes to hear both sides of every question on all occasions, the Review feels that not even the most enthusiastic Liberals will find fault of the Review in its humble way, feels disposed from time to time to draw attention to some erroneous or misleading statement and to occasionally point out some of the good points of the Conservative party, its candidate and its policy.

ONLY ONE THING TO DO

For the provincial general election which takes place on June 19th there will be three Candidates in the field: C. S. Blanchard representing the Conservative party, H. Lang, representing the Liberals and I. Bullivant as an Independent.

All three are well known throughout the constituency which takes in Redcliff, Medicine Hat and Dunmore.

The Liberal party was in power in this province from its inception as a province till 1921 when it was succeeded by the U. F. A. government.

Ever since the U. F. A. government came into power it has blamed its inability to balance the budget and put the province on a good solid basis, on the horrible state in which the province was when the U. F. A. took over the reins of office from the Liberal party.

Now Liberal and Conservative Candidates as well as the rank and file of both parties, are condemning the system of class government as practised by the U. F. A. party which has been in power for the last nine years. Liberals and Conservatives are fearful of the mounting debt of the province which has grown from \$57,000,000 in 1921 to what is estimated at \$104,000,000 for 1930. Conservatives do not overlook pointing out that during the 16 years the Liberals were in power at Edmonton the indebtedness of the province grew from nothing to \$71,000,000.

Five or six years ago the people of Canada experienced what Chase a half a dozen groups of representatives created in parliament, and on the first opportunity they got back as nearly as possible to the two party system.

Taking all the above into consideration as a guide to how to vote on the 19th of this month, viz:—The Liberals have been tried and found wanting; opposition to class government, and the uselessness of several parties there appears to be only one thing left to do and that is to

give the Conservatives a chance and see what they can do.

HEAR THE CANDIDATES

With dates now set for both Provincial and Dominion general elections there will be numerous questions to come before the electors for their consideration.

As candidates for all parties will be having meetings in town at which these questions will be

discussed, we would advise voter not to be too hasty in arriving at conclusions or promising their support until they have heard all the candidates outline the policy of their respective parties and explain their own personal stand with regards to these several questions.

The Review would also urge all voters to attend all the several meetings which will be held here during the next few weeks.

"STILL SERVING"

What the Red Cross is doing for the Good of Canada

For the Veteran

Behinds 3,500 soldiers still in hospital . . . relieve sickness and need in their families . . . care for the soldier settler . . . provides sheltered employment for the disabled in three Veterans' Workshops.

For the Children

Through Junior Red Cross, has aided 3,000 crippled children and has pledged over 157,000 school children to practice health habits and to serve others.

For the Pioneer

Brings nursing service to those in frontier districts through 39 Outpost Hospitals and Nursing Stations.

For the New Canadian

Welcomes and gives needed attention to immigrant mothers and children at three Sapper Nurseries.

For the Mothers and Daughters

In Home Nursing Classes, has taught principles of nursing, diet and home hygiene to over 12,000 women and girls.

For the Disaster Victim

Is organized to afford prompt relief to sufferers from fire, flood and epidemic.

STAMP OUT CARELESSNESS

Moderate Exercise Beneficial

If Sturdy It Adds To Life, But Cuts It Short If Violent

Fiftydays one has a great deal about exercise. It is fashionable to keep in trim, and a very good fashion it is too. Unfortunately, however, it is just as easy for a certain type of person to do himself harm by improper exercise as by not taking any at all. Too little is conducive to weakness; too much is apt to result in very serious consequences. Indeed, moderate exercise, as applied, is an excellent tonic and affords with especial force and significance to this particular problem.

Man is a creature of impulse and too often frequently we see a fussy, mope or red-headed individual who for years has given himself over to luxurious and easy living, suddenly take it into his head to reform. He feels the need for more exercise, and so, he suddenly puts on a whirlwind campaign of golf, or tennis or croquet, and would not be surprised if a man in perfect condition. Consequently when it is all over he has not gained himself any benefit, but is good by straining the muscles and possibly organs, almost certainly hurting his heart, and doing no good to his arteries, but he has quite taken the edge from his desire to be a "ho-man" and consequently settles down to a more moderate activity until once more a spasmodic urge moves him to action.

This sort of thing is decidedly harmful and even dangerous. Exercise should be steady, moderate, calculated to satisfy the passions of a man in perfect condition. Consequently when it is all over he has not gained himself any benefit, but is good by straining the muscles and possibly organs, almost certainly hurting his heart, and doing no good to his arteries, but he has quite taken the edge from his desire to be a "ho-man" and consequently settles down to a more moderate activity until once more a spasmodic urge moves him to action.

Exercise should be steady, moderate, calculated to satisfy the passions of a man in perfect condition. Consequently when it is all over he has not gained himself any benefit, but is good by straining the muscles and possibly organs, almost certainly hurting his heart, and doing no good to his arteries, but he has quite taken the edge from his desire to be a "ho-man" and consequently settles down to a more moderate activity until once more a spasmodic urge moves him to action.

A great doctor once wrote that the best way to acquire a good complexion is to take a pot of paint of two miles from home, and walk every day to see if anybody had moved.

But remember walking and strolling are two different things. The latter is what most people do when they think they are walking. For one thing they do not walk with their feet, they stride out, springing the ground.

Try the plan of setting yourself a good distance to walk every day. If your time will allow make it a good long walk. You will find this is one of the most excellent forms of exercise that you can take, and is itself sufficient to keep the average person in ordinary good trim.

Select a destination, then walk from your home. Start out with your

shoulders back, head up, chest tilted, swinging. In other words march along as though you were in an army. Wear comfortable, loose clothing and allow yourself half an hour to do the two miles. But as a programme which it carried out consistently, day by day, whenever the weather permits, will do a great deal towards improving the health of any one. Of course children are in a different class, and as regards exercise, just as they are in most other matters, and the average small child would do no good at all, walking as a regular sport. But as a rule children keep after their own health pretty well, and the parent has little cause for worry on this score, provided the child is kept out of danger and is regularly examined every child should be by the family physician.

Children who are kept at home in houses that are apt to be over-heated and poorly ventilated are at a great disadvantage compared to the healthy happy youngsters who mothers encourage them to be out of doors every minute of the time that it is possible for them to build up the health which is going to be so much to them when they grow to be adults. For much of a child's life should be made up of tag, marbles, kite flying, paper chases, lacrosse, bicycle riding, rowing, paddling, swimming, skating, hockey, snowball fights, skiing and sliding, such in its own season.

Of course children do not do any of these things because they think it is good for them. They play games because they like them, and if a child will take a leaf out of childhood's book in this regard he will be a healthy man. Moderate exercise should be enjoyable. It should be a recreation, not a drudgery.

One of the most important things about your physical programme is this: "try and keep it outdoors." Gardening is excellent, and taking photographs is an excellent one. If you have a car, leave it at home once in a while. But if you can't do that, try to go easily and above all regularly then there are three little exercises that service between the fur and the sea. The acquisition of the "Empress of Japan" will give the company a fleet of four liners on the trans-Pacific run. The fleet comprises the "Empresses of Russia, Asia, Canada and Japan."

While the "Empress" and "Zoroaster" are speed champions on the Atlantic, the "Empress of Japan" on this coast will bid for the blue ribbon on the Pacific.

The "Empress of Canada" at present holds the record of eight days 10 hours and 9 minutes from Yokohama to Victoria. The agent that any liner has come to this is 10 days.

A Worthy Every Again
A Lenoir County farmer again has deposited his \$4000 in a bank at Kingston, North Carolina, after keeping it buried near his home since 1920, when he became frightened over business depression.

It was said that when the man worried continually for fear the money would be dug up by some one.

Brian is used to make 35,000 different articles for household use.

Prince's Country Home
Is Being Put In Readiness For His Return
An open air swimming pool in the garden is one of the many features of the Prince of Wales' new country residence, Fort Belvedere, at Sandringham, Berkshire, is now being put in readiness for the return of his Royal Highness. Work on other alterations which the Prince approved before his departure, is being rapidly completed.

In the centre of the house is an old guard-room, built by the Duke of Cumberland in 1745. This has been converted into a comfortable lounge hall. Other rooms, including the Prince's bedroom, have been directly upon this hall. On one side is the dining-room, which also leads out to the garden, and on the other a drawing-room which has been converted from an old banquet hall.

Air Ambulance For Desert
Air ambulance service has been inaugurated in the Sahara Desert. It consists of six planes, governed by military authorities, and may be used by civilians at about 25 cents a mile.

Every season pilots are allowed to fly early in the day at low altitude.

W. C. CASEY
whose appointment to the position of Steamship General Passenger Agent, Winnipeg, with jurisdiction over the three prairie provinces has been announced by William Baird, steamship traffic manager of the Canadian Pacific Railway at Montreal.

Expects To Make Record

"Empress Of Japan" Will Speed Up Schedule On Pacific

While steamship lines on the Atlantic are adding feverishly for supremacy by construction of larger and faster liners a milder form of competition is being enacted on the Pacific.

The Canadian Pacific Steamship Company is bringing to this coast a new liner which outshines anything in regular service on the trans-Pacific route.

When the "Empress of Japan," a modern version of the once proud clipper built liner of the same name, arrives here on August 18, a new race for trans-Pacific trade will be commenced.

The largest and fastest liner engaged in regular traffic on the Pacific coast will speed up the schedule of the company, giving as frequent service between the Far East and this continent as is given by other liners with a greater number of ships.

The acquisition of the "Empress of Japan" will give the company a fleet of four liners on the trans-Pacific run. The fleet comprises the "Empresses of Russia, Asia, Canada and Japan."

While the "Empress" and "Zoroaster" are speed champions on the Atlantic, the "Empress of Japan" on this coast will bid for the blue ribbon on the Pacific.

The "Empress of Canada" at present holds the record of eight days 10 hours and 9 minutes from Yokohama to Victoria. The agent that any liner has come to this is 10 days.

On one side is the dining-room, which also leads out to the garden, and on the other a drawing-room which has been converted from an old banquet hall.

Air Ambulance For Desert
Air ambulance service has been inaugurated in the Sahara Desert. It consists of six planes, governed by military authorities, and may be used by civilians at about 25 cents a mile.

Every season pilots are allowed to fly early in the day at low altitude.

A Valuable Study For Young People

Memorizing Arithmetic Tables is Excellent Training For Mind

How often when we were little did we learn the old arithmetic down and declare that we were not going to learn any more tables because, well, what was the use of all this silly nonsense, anyway?

And now when we hear Johnny mumbling like a magpie, such as 54, 738 are 56, for weeks on end, and down the scale of arithmetical numbers, apt in and out of the tables of dominion ones, aren't we still inclined to think that such mental gymnastics have lost none of their foolishness through the intervening years?

Well, if we hold that opinion without qualification, we are wrong. Because there is a much greater principle involved in memorizing uninteresting statistics than appears merely on the surface, and a benefit greater than the mere possession of off-hand knowledge.

Minds are like muscles, or horses, or steamboats, or airplanes—anything that they are not used to discipline. We have to make it do it. We have to make it do it. We have to make it do it. We have to make it do it.

That is why schools continue to teach certain things that may look to many modern parents as old foggy and dead-wood.

Arithmetic, of course, is not all rote, nor a half, nor a quarter. Its problems are a direct stimulus to reason as well as memory. But under both these functions is the smashing test of discipline. We have to break a horse to the bridle before it can plow. We have to put a snaffle on the mind, with tables and measures, and propositions and theorems, if we wish to show it who is master.

No! I wouldn't be so quick to pronounce judgment on any type of mathematics in school work, unless, if I may sidestep a minute, some particular work seems to far advanced for a child's years. That's not so good. To go back to the simile, you can't expect the colt to do work beyond his strength, whether he is broken or not. But this is no argument against arithmetic itself.

It has been brought to light that a child who for reasons of illness or inopportune during early youth, has escaped definite mental drill of either tables or figures adequate to them, grows up without the incentive of definite aim. He develops a "what's the use?" attitude and becomes a dilettante and a dreamer. He may be a genius, but what is a genius without direction of purpose?

That static genius accomplishes anything. So perhaps we'll not think we are being old-fashioned if we look at the clock and say to Johnny: "It's getting late, son. Better get up your tables."

"Best lighting" is the reflection of thunderstorm too far distant to be audible.

Boy criminals are becoming a serious problem in Ireland.

Place As the City

Another prairie Manitoba is to try out the "Country Health Unit" as a means of safeguarding rural health.

Another prairie Manitoba is to try out the "Country Health Unit" as a means of safeguarding rural health. The Federal Government, recently was sponsored upon this plan. When H. E. Spencer, M.P., moved that the Federal Government consider subsidizing Country Health Units, and the motion carried without division of the House.

The district of St. James' Manitoba, will establish a Country Health Unit—or small, full-time medical department of health, staffed with a medical director, a nurse, a sanitary inspector and a clerk. The cost will be shared between the municipality itself, the Manitoba Government, and the Rockefeller Institute.

In this way, the province of Manitoba follows the lead of Quebec, Saskatchewan, and Ontario, in the plan which provides have Country Health Units.

This unit plan, which has been endorsed by scores of farmer organizations is unanimously chosen by public health workers as the only means of reducing the death toll evoked, to date, for giving rural areas the same protection that big cities with their expensive, efficient Departments of Health have enjoyed for several years.

Where Rain Seldom Falls

Seventy Years Drought Is Common in Parts Of South America

Many people, if asked what was the driest place in the world, would name for Central Australia, where rain fell last year after a drought that had lasted for seven years. They would be wrong, says an English paper, for there are some parts of South America where a seven year's drought is soiling, and a man can live off the "rainwater's" three rows of ten—without ever seeing a drop of rain. Of course, it may rain some times. Lord Ernest Hamilton has described the coming of rain in Lima, the capital of Peru, during a visit he paid there. "We were fortunate enough to be favored with the only shower which Lima had enjoyed for seventy years," he writes in his book "Forty Years On." "For five minutes, it rained solid tropical rain. The terror-stricken inhabitants thought the end of the world had come." But if America can boast of some of the driest places in the world, it also contains some of the wettest. Greytown, in Nicaragua, has had no such 29 inches of rain in a single year.

Shipment Were Reversed

Mink From British Columbia Sent To Alaska

The usual procedure of shipping furs from the Far North, has been reversed, and an order for three pairs of mink, head and tail, and the right lights of Stewson, a fishing hamlet south of Vancouver, was filed by A. R. Hanson, fur farm operator, and landed on the shores of Great Slave Lake.

Instead of coming out of the wilderness to civilization as furs, the shipment went back from the seaside to the interior, to the prospective proprietors of a new mink colony, and they covered the last 300 miles by airplane.

Canada Has Best Pulp Wood

There is no greater pulp wood in the world than Canadian spruce. In the paper industry white spruce is the most important raw material, and for that reason is chiefly responsible for the fact that Canada at present an investment of \$600,000,000 in the pulp and paper industry in Canada with products valued at over \$250,000,000 annually.

The British Cost Of Arms

The lion and the unicorn used in the British coat of arms were introduced by James the First. The lion is a symbol of Scotland, and the unicorn and the unicorn had long been a favorite supporter in Scottish heraldry.

The Zeppelin is soon to make another annual trip. Our idea of a soft job is that of the man who gets out the Zeppelin, probably.

"I gave you a plate of soup yesterday and you return with another man."

"Hem, I have taken in a holger."

WORLD HAPPENINGS BRIEFLY TOLD

There are 27 aeroplanes in use by the Canadian Government at present. Canada has spent \$63,886 in sending delegations to the International Labor convention at Geneva, last 1925.

Earl Brydges, champion dog team driver of the world, is to become a resident of Ontario and Quebec. He is taking with him the team which is spoken to the world's title at the Pan dog derby this winter.

Navigation on the Great Lakes officially opened April 28, with the arrival of the "Hamonic" and "Noronic" at Port Arthur with 3,000 tons of package freight for Western Canada ports.

For the eleven months ending February 28, 1930, a total of 406,989 radio licenses had been issued in Canada. Ontario with 201,941 receiving sets leads Canada. Saskatchewan has 31,266; Alberta, 20,574 and British Columbia 34,428.

The vaults of the Bank of France now hold more than one-sixth of the gold reserves of the world. France stands second in this respect only to the United States. Her present reserves exceed those of Germany, Italy and Britain combined.

So far this year, there have been 29 forest fire break out in British Columbia. The extent of the conflagrations was to the United States. Her present reserves exceed those of Germany, Italy and Britain combined.

The body of Robert Bridges, poet laureate of England, was cremated at Golders Green, with such secrecy, that even the closest friends of the family were unaware of it. The poet's widow and daughter were among the few who were present. There were no flowers.

En route to Myfair, Saskatchewan, where they have purchased land, Louis Nadeau accompanied by his family and a brother and sister, arrived at North Portal from Chippewa, Mass., in a truck fitted up as a home. They are returning Canadians and made the whole trip by motor.

Industry Growing In Value

The value of the mining industry to Manitoba is strikingly shown in a report of the Manitoba Chamber of Mines, which shows expenditures for the year 1927-28 as follows: 1927, \$1,535,619; 1928, \$4,853,185; 1929, \$12,302,926. The wages item shows expenses in 1929 to have been eleven times as great in 1927.

Endured Years Of Hardships

Andreas Solider Returns Home, But Is Now Italian Citizen

From the little village of Campi, near Trento, Italy, August Lorenz, 35, departed, 13 years ago as an Austrian soldier to fight the Russians. He has now returned after years of hardships to find himself an Italian citizen, because his village, by the fortunes of war, became Italian. Lorenz was captured by the Russians in 1914. He was sent to Semipalatinsk, then to Tomsk, Barmara, Tambov and Goral. He was made to cut down trees until the work broke his health.

Then he farmed out to a miller, with whom he was working at the time of the revolution in 1917. The Bolsheviks sacked the town and burned the mill. Lorenz fed at night. He passed several years of intense misery until in 1921 he became a farmer. It was not until the following year he was able to send a letter to his relatives in Campi. He did not then know that the war was over.

The next year, despairing of ever being able to return to Russia, he married the daughter of a farmer. In 1928 the authorities at Campi, through the Italian ambassador at Moscow, began to exert influence to allow him to return. But the Soviet government, because he had married a Russian, withheld his passport for four years. At last they let him go with only eight dollars and a few articles of clothing.

Winnipeg Newspaper Union

Feature

(By Eva A. Truog)

There is Digby, Nova Scotia—the fishing centre; Parramatta, the Port of New South Wales; Yarmouth and Weymouth, the two fishing centres and Old Orchard, Maine—a famous bathing resort.

PACIFIC COAST

Another fascinating excursion is that to the Pacific Coast. This allows of opportunities for the excursionist to see the majestic scenery associated with the Canadian Rockies, to see beautiful Lake Louise, to enjoy a round of golf on the famous courses at Banff Springs, or to stay a week or so at the English Lake Charles—these places, the fresh mountain air and the scenery that is a truly one of the chief features of this tour in the nature of a side-trip.

In a twenty-four hour tour, which takes the visitor by way of the famous Banff-Lake Louise region, through the Kicking Horse Pass to the Yoho Valley, perhaps the most glorious and varied scenic trip that has ever been offered on this continent. Then on by train through picturesque British Columbia with its stupendous mountains, glaciers and waterfalls. After Vancouver—Victoria, the capital of the province, the Dominion Astronomical Observatory—with the second largest telescope in the world, and Butchart's sunken garden, are the chief features of this tour. Two famous excursions are offered—a ten day cruise to the West Coast of Vancouver Island. To those whose vacation period is short, the famous Canadian Pacific "Trans-Canada Limited" is a most valuable and speedy travel. It is equipped with de luxe sleeping cars, dining cars, rum lounge, women's lounge and bath, men's bath, smoking room, observation lounge and a valet service. It is faster and faster than ever, and the equipment of each train entails an investment of over a million dollars.

YOUTHFUL AND CHARMING

All Truog models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers. It has been planned that their debutante skirts will love this smart little frock. It has box-pleated, a finish the skirt and switch jaunty about.

The sections giving such a professional effect are merely tucks, and these can be omitted if preferred. Returning to the box pleats again, you will note that these are large enough to keep well pressed quite easily.

Remove the collar and cuffs of the original model in scarlet red that were of cream wash silk (in the red silk), they would also be very effective in self material or in spotted and printed designs. Navy and white is always stunning for such models too. Try greens, light blues, etc., in place.

Accessories: red, crepelle, kashas, granola, line serge, broadcloth, etc., are good.

This pattern may be obtained in sizes 14 to 20. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size and pattern. Address Pattern Department.

Canadian Pacific Offer Attractive Summer Tours

In your vacation anytime between May 15th and September 30th 1930, why not take one of two very interesting tours—al, reduce prices offered by the Canadian Pacific?

Consider first the Eastern Tour and what it has to offer. It will take you to the tourist to visit Ontario. Old French Canada—with its picturesque "chateaux," and the Maritime Provinces—with the interesting fisherfolk and their equally-interesting craft. The tourist may travel to these places entirely by rail, or may choose to travel some of the way over the cool waters of the Great Lakes on a great white Canadian Pacific Great Lakes Steamship.

Various Ontario resorts at the lakeside provide fishing and bathing and, in fact, all summer sports. Niagara Falls, the beauty of which attracts so many people from all parts of the world, is only one of the many other salient features of this tour. The travelling is done on the Canadian Pacific, the Catholic shrines that are scattered along the route. The "tablans" rolling past on their quaint wicker chairs, and in Montreal the visitor will be awed by contrasts. There, drawn up at the foot of the latest ocean liner—a product of the new world, while almost in the very shadow is the Boscageur Market, where the French "habitués" sit their ferns and just to see their relations in the old land. Then again, the excursion may be taken on as far as the Maritime—St. Andrews, where the sea and artists meet. In proportion to its size, there are more than 100 towns in St. Andrews than any other town in Canada.

There is Digby, Nova Scotia—the fishing centre; Parramatta, the Port of New South Wales; Yarmouth and Weymouth, the two fishing centres and Old Orchard, Maine—a famous bathing resort.

PACIFIC COAST

Another fascinating excursion is that to the Pacific Coast. This allows of opportunities for the excursionist to see the majestic scenery associated with the Canadian Rockies, to see beautiful Lake Louise, to enjoy a round of golf on the famous courses at Banff Springs, or to stay a week or so at the English Lake Charles—these places, the fresh mountain air and the scenery that is a truly one of the chief features of this tour in the nature of a side-trip.

New York University Given Valuable Papers

Early English Legal Documents Date Back 700 Years

A collection of more than 400 Early English legal documents, some of them dating back 700 years, has been presented to New York University by Judge Moses H. Grossman in the name of Frederick Brown, real estate operator and philanthropist.

Among the collection is a 12-leaf parchment "pip-roll," made of a series of skins sewed together and originally the record of the king's revenues. It records that a sheriff, Richard Pyle of Southampton County, collected the revenues in 1638 from the Jews for protection from being defrauded from the knights, and "from the knights for license to defraud the Jews."

Recipes For This Week

(By Betty Barclay)

CREAM OF POTATO SOUP

4 medium potatoes.
2 slices onion.
2 strips bacon.

Wash, peel, cut in cubes, and cook potatoes in enough water to cover until tender. Rub through a strainer. There should be 2 cups mashed potatoes and liquid. Add this mixture (left-over potatoes may be used) to 3 cups of this cream sauce (3 cups milk, 3 tablespoons sour, 3 tablespoons butter). Season to taste. Add 2 tablespoons chopped parsley before serving.

A different flavor may be obtained by adding carrot, leeks or celery instead of onion. Cut leeks or celery in very thin slices crosswise and cook in the potatoes.

KIDDEES DELIGHT

3 cups milk.
3 eggs.
4 tablespoons sugar.
1 teaspoon vanilla.
1 teaspoon salt.
Few grains nutmeg.

Prep. Grains cinnamon. Beat the eggs until very light. Add the sugar, salt, vanilla and spices, then the milk. Stir till the sugar is dissolved, then beat well. Serve cold.

To carry away static electricity from oil trucks, rain chains that dangle to the ground are fastened to the frames.

Physicians have stated that a cough or a cold that lasts more than three weeks merits a general physical examination.

England obtained the pattern for her early churches from missionaries from Italy.

Some men make a specialty of getting into trouble.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and live stock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Selling Its Last Secrets

Quarter Adams Public Info Sultan's Harem At Istanbul, Turkey

Once royal dispenser of terror and mystery to the mystery-loving world, Istanbul is now selling the last of her secrets.

By order of the Turkish Republic, the doors of the imperial harem of the Seraglio palace of the Ottoman Sultans have been thrown open. In-balls and followers of the prophet Allah may pass, for the price of 25 cents the threshold whose crossing would have once cost them their lives.

For four and a half centuries, this was the most jealously guarded corner of the vast palace, and of the vast Ottoman empire. Great walls, heavy bronze gates, thousands of soldiers without and hundreds of eunuchs within, kept inviolate the mystery of the imperial harem. Now the public may stalk through the dusty labyrinth of rooms and corridors that seem to trail on and on indefinitely, one after the other, still faintly glowing with the same brocade hangings and silken couches, tiled walls and frescoed ceiling of the sultans and dowagers, the eunuchs, and thousands of slaves who lived their hidden lives within these walls.

Important Letters Now In Dominion Archives

Canada Has Most Of Letters Signed By Sir John A. Macdonald

The first public document signed by Sir John A. Macdonald has been added to the voluminous collection of his papers gathered together by Dr. A. G. Doughty, curator of the Dominion Archives. It is an affidavit sworn by John A. Macdonald on June 6, 1834, upon his appointment as a poll clerk in the Upper Canada election in Prince Edward county. He was 19 years old at the time.

With the receipt of this letter, the Dominion Archives now holds most of the important letters written by the first premier of Canada. Among the papers is the first draft of the British North America Act, Sir John's handwriting.

Parachute Opens Itself

Was Pronounced Success In Test At Curtiss Field Recently

An autolite parachute, which opens of its own accord after a jump, was demonstrated successfully at Curtiss Field by John Rungger, a professional parachutist. Rungger, his hands tied behind him, jumped from a plane at 2,600 feet. He landed in a tree.

So pleased was Rungger with the "chute" that he said he would jump from a plane at 10,000 feet. It was invented by John Ruby.

Would Rotate British Stones

Suggesting that the various Canadian stones be used in rotation on projected Federal buildings, the Industrial Development Board of Manitoba has devised a plan to lay before the Dominion Government in which it is urged that future plans for building operations take into consideration the possibility of having various Canadian stones used in rotation, including the Manitoba Tondal stone.

One of the attractions at Cannes, France, is a woman who lives on ground glass in a glass cage.

The world produced 1,323 million barrels of crude oil in 1929.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNES SUNROOMS ETC.

Canadian breeders of poultry and live stock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER X—Continued.

Long after the dust raised by Jim's car had vanished, the old lady still watched the road at the point where he and Charmian had turned to wave.

"Well," she sighed, "I kind of wish I knew how 'til' all end. I can't help being fond of Jimmy. He's a good boy, and he'll make some woman a splendid husband—that is, if he's not too fanciful in his way of thinking. Sometimes I believe that all there is the matter with him is just being tied too close to Wickfield. There he was all ready to go to Harvard along with Billy Krowles, and that fool of a Sarah Bennett took on as about his leaving her that he gave it up and went into the bank instead. What Jim needs is a fresh outlook, but dear knows when he'll get it unless his mother should be removed by a merciful Providence, and she's uncommon healthy."

At this point Grandma's thoughts were interrupted by Lizze Baker's Persian cat, which, being vigorously chased by the Merry Gyp, took refuge in a horse chestnut tree across the way.

"No need of you standing there glaring at me, Gyp," admonished Grandma. "The good Lord knew what he was about when he gave pussy her claws. That's it, you dig up a bone and go along home peaceable and eat a good dog. I expect that cat'll die of heart failure some day."

Grandma nodded for a moment, and when her eyes opened her thoughts had returned to Charmian, Jim Bennett, and their problems.

"If Jimmy could only get 'er to see things the way she does—poetry, and sunrises, and small-paned windows in old houses," she mused, "it would be all right. Now that young doctor, he understands without explaining. . . . If Charmian let the biscuits burn while she watched a sunset (though come to think of it she never did do such a thing), why she'd just laugh about it. It's the natural, and not too rusty about what he eats. I've no doubt he'd make her a more suitable husband than Jimmy Bennett would."

He's more her sort. . . . and yet—Good land alive! she broke off suddenly, "there comes that old baker on the run! I wonder if the Town Hall burning. I haven't seen her run for fifteen years!"

CHAPTER XI

What's happened?" asked Grandma, as her old friend puffed into the room and made some remarks on the nearest chair. "You shouldn't run at your age, Lizze, heavy as you are. Have you had news yet?"

**Instant Relief for
Corns
Sore Foot Lumps
PUTNAM'S

can get rid of his worst clothes and credit for being charitable at the same time."

"I dunno but what a string of beads would be more use to the deacon than that old silk hat," answered Miss Lizze. "It took me a powerful lot of 'em, though I put a cracked butter dish inside it, and some woolen stockings. Savages are partial to beads, so I've always been, so like as not the beater are, too; and the beads would cover a little of their nakedness, which, a hat wouldn't."

Grandma's lips twitched with amusement as she replied: "Horse-ho, Lizze, I don't think Ed Purdie is counting on giving those beads to the heathen. Lizze More isn't the only poble on the bench, as they used to say, and if she won't have him, he's likely to look further. Maybe he'll ask you."

"Aye!"

In her indignation Miss Lizze tried to rise, but she was what she called "fleshy" in Wickfield, and the chair was a small rock with arms, which showed a tendency to rise when she sank back behind it. "I'm ashamed of you, Grandma Davie! Why, I wouldn't take Ed Purdie, not for a crown's worth of beads like the bag that city woman carried to the strawberry festival."

"There! there!" soothed the old lady. "I didn't mean to get you all stirred up. If he did ask you, it would be the only sensible thing he's done since he asked your first."

"Well," sighed the child, relighting enough to smoke this tribute, "I dunno but what you're right, though so fur's I know, no man has ever agreed with you. I pray he'll just as well, I've always thought a proposal would be a terrible embarrassing thing to me."

Grandma's eyes twinkled. "No it might be, Lizze, under certain circumstances," she admitted. "You got to go this quick!" As Miss Lizze made another effort to leave the chair. "If Charmian was to come home I'd ask you to stay in dinner, but I guess you won't have much but a pick-up. She's gone over to South Wickfield with Jim Bennett to collect a mortgage or something."

"I seen 'em start!" With a firm wrench Miss Lizze extricated herself from the chair. "I'm glad that Jim has come to his senses and dropped that Darling girl. He ain't taken her out but once since the strawberry festival, and then his mother invited her to supper and he had to beat her home. She's the laziest woman in the town of the week. I declare, Grandma, it'll be a load off my mind, haw! haw! her going."

Grandma was so absorbed that she didn't notice a near-dog-light across the street.

"It was beads," replied Miss Lizze promptly. "A bag string of fancy beads that cost the deacon a week's pay more. Oriental, he called 'em, though Sarah Bennett, who seen 'em with her own eyes, says they don't look no mite better than what you can get at the five-and-ten store in Portland. I wonder the deacon carried 'em back the way he asked her; and like a fool he give 'em to her first. Guess he thought they'd most of pave the way for intentions; and according to him she seemed real pleased—said he was her heavenly color, and let his fasten 'em around her neck himself, 'so 'round you laughs' at, Grandma!" broke off Miss Lizze, as the old lady suddenly gave way to mirth.

"I was only thinking how silly Ed Purdie must have looked when he fastened those beads around Luska's neck. Go on, Lizze, I'd he ask her then?"

"I dunno," he said, "it bein' what you might call the proper manner; but according to him she sort of put 'em off. And here's where the trouble comes—trouble for Luska, I mean. She let him kiss her! Of course he won't think it was good as far as she's concerned, but I guess she'd have been driven clear to South Wickfield next evening for a little love making after the children was in bed, she'd changed her mind! They had words, and he asked for the beads back and she wouldn't give 'em up—said he'd made her a present of 'em, and so fur's she knew there wasn't no string tied to it. He come away madder a wot hen and vowed to get the law on her. And next mornin' he put the case in Lawyer Gardell's hands. He's suit for two thousand dollars and possession of the beads. They say Can Gardell tried to calm him down, and means to settle it out of court, if it takes reasonable. Now how do you ever bear the heat of that?"

"No," replied Grandma soberly, "I never did but what I'd Purdie do with those beads if he gets 'em back. I'd like to ask him 'em 'em 'em, 'em, Lizze, and they wouldn't be any special use in a missionary barrel, which every one in Wickfield knows is the only charity he ever gives to, and that only because

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry a few Aspirin tablets in your pocket with you. Keep the larger size at home. Read the proven directions for pain, headache, neuralgia, etc.

Vienna Uses Science In Detecting Criminals

Can Convict Man Who Believes He Has Left No Trace

Some may be inclined to smile at the idea of Dr. Wlad Darczynski, Montreal, of a criminal laboratory for Ontario, but it is a valuable suggestion. Science has played an important part in murder trials, particularly in poison cases, and in the analysis of spots of blood, but a criminal laboratory can go much further than this.

In no country has science been developed to such an extent as in the detection as in Vienna. Here is a case in point.

A man was found murdered with a pocket knife in his hand. The owner of the knife proved that it was stolen from him some months before, and that he had nothing to do with the murder. The knife was turned over to a professor at the university, who took it to pieces and analyzed the debris which had collected between the blades from the pocket of the man who had been using it.

He found tiny pieces of twist from the lining of the coat pocket, and came to the conclusion that the coat was of the color of yarn used by English manufacturers in the making of what are called "Norfolk coats."

With this clue, the police set about finding a Vienna tailor who sold English suits of that kind. They found him, and then by examining his books they checked up on the movements of all the men who had bought Norfolk suits within a certain time. Ultimately, they laid their hands by the heels and he was convicted.

A criminal laboratory can convict a man who has committed what he may consider a perfect crime without leaving any trace.

Displayed His Originality

Mark Twain Started Literary Career

On his brother's paper, the Long-ought newspaper files containing original first works of Mark Twain, famous humorist, and described by him in his autobiography as representing "my first literary venture," have at last been discovered.

On his brother's paper, the Long-ought newspaper files containing original first works of Mark Twain, famous humorist, and described by him in his autobiography as representing "my first literary venture," have at last been discovered. It is Samuel, his native home. The reveal the boy, Sam Clemens (Mark Twain), in 1853, as substituting "I'll be bound, I mean to look like a real writer, and I'll strive to 'give up' the columns of the paper with his wit. His methods reveal him as even then richly possessed of the ingenuity he later instilled in his famed fiction characters. Tom Sawyer and Huckleberry Finn.

The return of Orion, to discover that his young brother had been making the paper "up," is indicated in an editorial, by the editor, May 13, 1853, saying that "Rambler and his enemies must stop their stuff." This editorial edict seems to have ended Mark Twain's fun, and what probably were his very first literary and journalistic efforts.

Was Queen Alexandra's Friend

Honorable Charles Hollins, companion and intimate friend of the late Queen Alexandra for more than half a century and one of the best known figures in court circles, is dead at the age of 85. Queen Alexandra frequently referred to her as "my beloved cousin," and on one occasion created a precedent by refusing to leave London for Sandringham at Christmas time because of the illness of her friend.

Tat's Will Filed

The will of William Howard Taft, former president of United States and former chief justice of the Supreme Court, has been filed. It leaves most of the estate to his widow with the exception of a few individual legacies.

Count Tolstoy, the Russian author, always went hatless and bareheaded no matter what the weather.

Pompous Person (having collided with small man)—I wish you'd look where you're going, sir.

Minard's Checks Felling Hair.

Made Long Journey

Torn Banded In Labrador Was Seen In Southern Africa

A common term, member of the gull family, was banded in northern Labrador by Oliver H. Austin, Jr., in July, 1928. Fourteen months later it was seen and examined at the southern tip of Africa, on the Indian Ocean, 9,000 miles away, which is thought to set a record.

The tern, or sea swallow, is usually smaller than the gull, its bill is more slender, its feet not so strong, and its flight more graceful than that of the gull. The common tern is pure white with a cap and moustache of bluish gray and is sometimes banded on its feathers. The all-white species live on Pacific islands, those with darker coats are widespread.

KEEPING BABY LOVELY AND WELL

Some babies thrive from the hour of their birth while others make little progress, and in the cause of much anxiety. As a rule it is the delicate child that at first with backward eyes and they start to go ahead directly Baby's Own Tablets are made the corrective of their stomach and bowel troubles.

Baby's Own Tablets are specially designed for the use of babies and children. They are safe and the mother can feel perfectly secure in giving them to the most delicate child. They are a great but through laxative which banish constipation and indigestion, break up colds and simple fevers and all the ills which accompany the colic of teething. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fame Is Transitory

People Who Perform Unimportant Exploits Soon Forgotten

An English adventurer proposes to dive off the Ambassador Bridge at Windsor, a distance of 160 feet above the water. The honor to be won by such exploits is extremely transitory, as was proved in the case of Steve Brodie. A gentleman once took his son to the spot on the Brooklyn Bridge from which Brodie had made his celebrated leap and said: "Yes, my boy, this is where Brodie jumped off the bridge." "Jumped off it?" echoed the boy. "I thought he jumped over it!"

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother who feeds her baby with Worm Expeller will clear the stomach and instill rest and healthy sleepfulness.

A Calgary aviator flew his plane both ways over the highest peaks of the Rockies. The more these things happen the more veneration we have for the men who have done them and over the Rockies with dog-team and pack-trail.

Gyproc Gives PERMANENT PROTECTION

Made from Gypsum Rock, Gyproc Wallboard not burn. And this year it is the smooth ivory finish that needs no decoration (when paneled) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fire-safe Gypsum board or write for free illustrated book, "Building and Remodelling with Gyproc."

If Sorrowing, Beware, Says Doctor. Gain Quick

New Fronted Yeast Adds 4 to 15

Found in 2 Weeks, New Health, Strong Nerves—Or No Cost

"Bimby folks subject to many, grave diseases," says Dr. eminent physician. When sick they lack rest, get little sleep, and in a week, "Don't run risk of dangerous disease from skinless. New Fronted Yeast adds 4 to 15 lbs. in 3 weeks. Ends nervousness, constipation, indigestion over many years since his magic. New pep first day."

Get new health and weight quickly. Get pleasant habits of ironed sleep from druggist today. Peel great tomorrow. If not delighted, manufacturer refunds your money.

Little Helps For This Week

"They that seek the Lord shall not want any good thing."—Psalm xxxiv.

Father! replenish with Thy grace This longing heart of mine; Ever tries it for comfort or cure, Thy sacred, innocent shrine! Forget that of my spirit were; Enfold her in Thy changeful peace, So she from all but Thee may cease.

—Angelus Silesius.

God is Alpha and Omega is the great word; endeavor to make Him so in thy little world. Make Him thy evening epilogue and thy morning prologue; practice to make Him thy last thought at night when thou sleepest, and thy first thought in the morning when thou wakest; so shall thy rancy be sacrificed in the night, and thy understanding rectified in the day; so shall thy soul be pure, thy labors prosperous, and thy death glorious—Quaker.

It Testifies For Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself to be no quackery. This shows why this Oil is in general use.

Interested In Grain Shovel

The commissioner of agriculture of the state of Montana, writes that there is much interest in the World's Grain Show in that state. The officials are encouraging growers to enter the contest most who are ready and to begin the preparation of exhibits this season.

Mauna Loa, in Hawaii, is the largest active volcano and mountain mass in the world.

Use Minard's for Burns.

The Spaniards were among the early explorers of the coast of Southern Alaska.

Interesting Local Items

Come to the Elite Cafe Saturday night for Fish & Chips. Flagg was flying in town last Monday in honor of King George's birthday.

A nice rain Tuesday night did much to improve crop conditions in this district.

Stampede stickers for cars are now ready for handing out. All car owners should call at the Review Office and get one.

B. J. Bott who has been in the Milk River district in the oil business for the past few months is spending this week in Medicine Hat.

The engagement of Miss Anna McKay to Gordon H. Wray, son of Dr. and Mrs. Wray, formerly of Redcliff, is announced, the wedding to take place this month in Calgary.

All those wishing to engage space for booths on the stampede grounds for July 1st should make their application to the Secretary, A. R. Ballantyne, at once.

Everything now points to a big day here for Redcliff Stampede on July 1st. All arrangements have been completed and nothing but bad weather can prevent a big days program.

Mrs. A. E. Tester returned home last evening from Calgary where she had been with her daughter, Miss Beatrice, who is undergoing treatment there. Mrs. Tester reports that her daughter is progressing favorably.

Returning officer Simpson states that there will be approximately 5,241 votes on the list in this provincial constituency for the election on June 19th. Of these there will be 484 in Redcliff.

Football games for the next week are a league game between the Brick & Coal and the Callies in the Hat on Friday of this week. The Legion and the Callies in the Five Roses on Tuesday, June 10. The Brick & Coal and Redcliff on Wednesday, June 11th.

While fishing up the river west of town Chas. Fitzhenry and C. A. Benjamin landed a 40 pound Sturgeon. It was one of the largest fish ever taken out of the river around here. The fish measured 4 feet 8 inches and the head alone weighed 8 pounds. When pulling in the line the fishers thought they had hooked on to a drowned man and when the fish came to the surface they thought it was a whale. They had quite a time landing it and getting it home.

King George was 65 years old last Tuesday.

Bienheim, owned by Ara Khan and Indian Prince, won the Derby yesterday. The race was one of the best on record and was witnessed by half a million people.

The Liberal candidate for Empire constituency had a meeting billed for Bowell yesterday afternoon but the farmers of the district were too busy to attend. They went over to Suffield however for his meeting in the evening.
